

ASIP DATA COLLECTION PROCESS OVERVIEW 2005

Overview of ASIP

What is ASIP?

The official Department of the Army database that reflects the Authorized planning population for Army Installations.

ASIP population is used as a basis for developing Base Operations (BASOPS) requirements in Service Based Costing (SBC) and to Develop facility allowances in Real Property Planning and Analysis (RPLANS). ASIP population is also an input to the Military Construction (MILCON) process.

Overview of ASIP

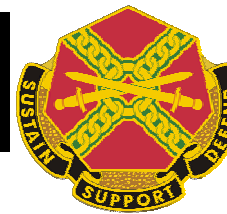

The ASIP....

- Documents Composition and Location of Authorized Army Forces Worldwide
- Is a baseline for installation planning
- Is consistent with approved and documented Army Force Levels
- Captures other tenant activities

The ASIP Provides

- A consistent look at Forces to be supported
- Visibility to potential planning issues
- An audit trail to official Army Force Planning Documentation
- A feedback loop to help correct Force Structure discrepancies

Overview of ASIP

Units, Organizations, and Loads in ASIP Top loaded

- Army Units/Organizations
 - Active Army, US Army Reserve, Army National Guard
 - MTOE, TDA, and TDA Augmentations to MTOE
- Army School Loads
 - PCS, TDY, Trainees, Reception Loads
- Special Army Populations
 - Non-Additive Authorizations, RC Full-time Support, AGR
 - Rotational Loads at Army Training Centers

Garrison Generated

- Tenants Other Than Army
 - Contractors, Other Services, DoD Agencies, KATUSA, USACE Civil works, Commercial Activities

Below the Line Numbers

- RC Training Loads, Other Surrounding Population

Tasker Description

Tasker is a two-part tasker:

Part 1: Planning Phase

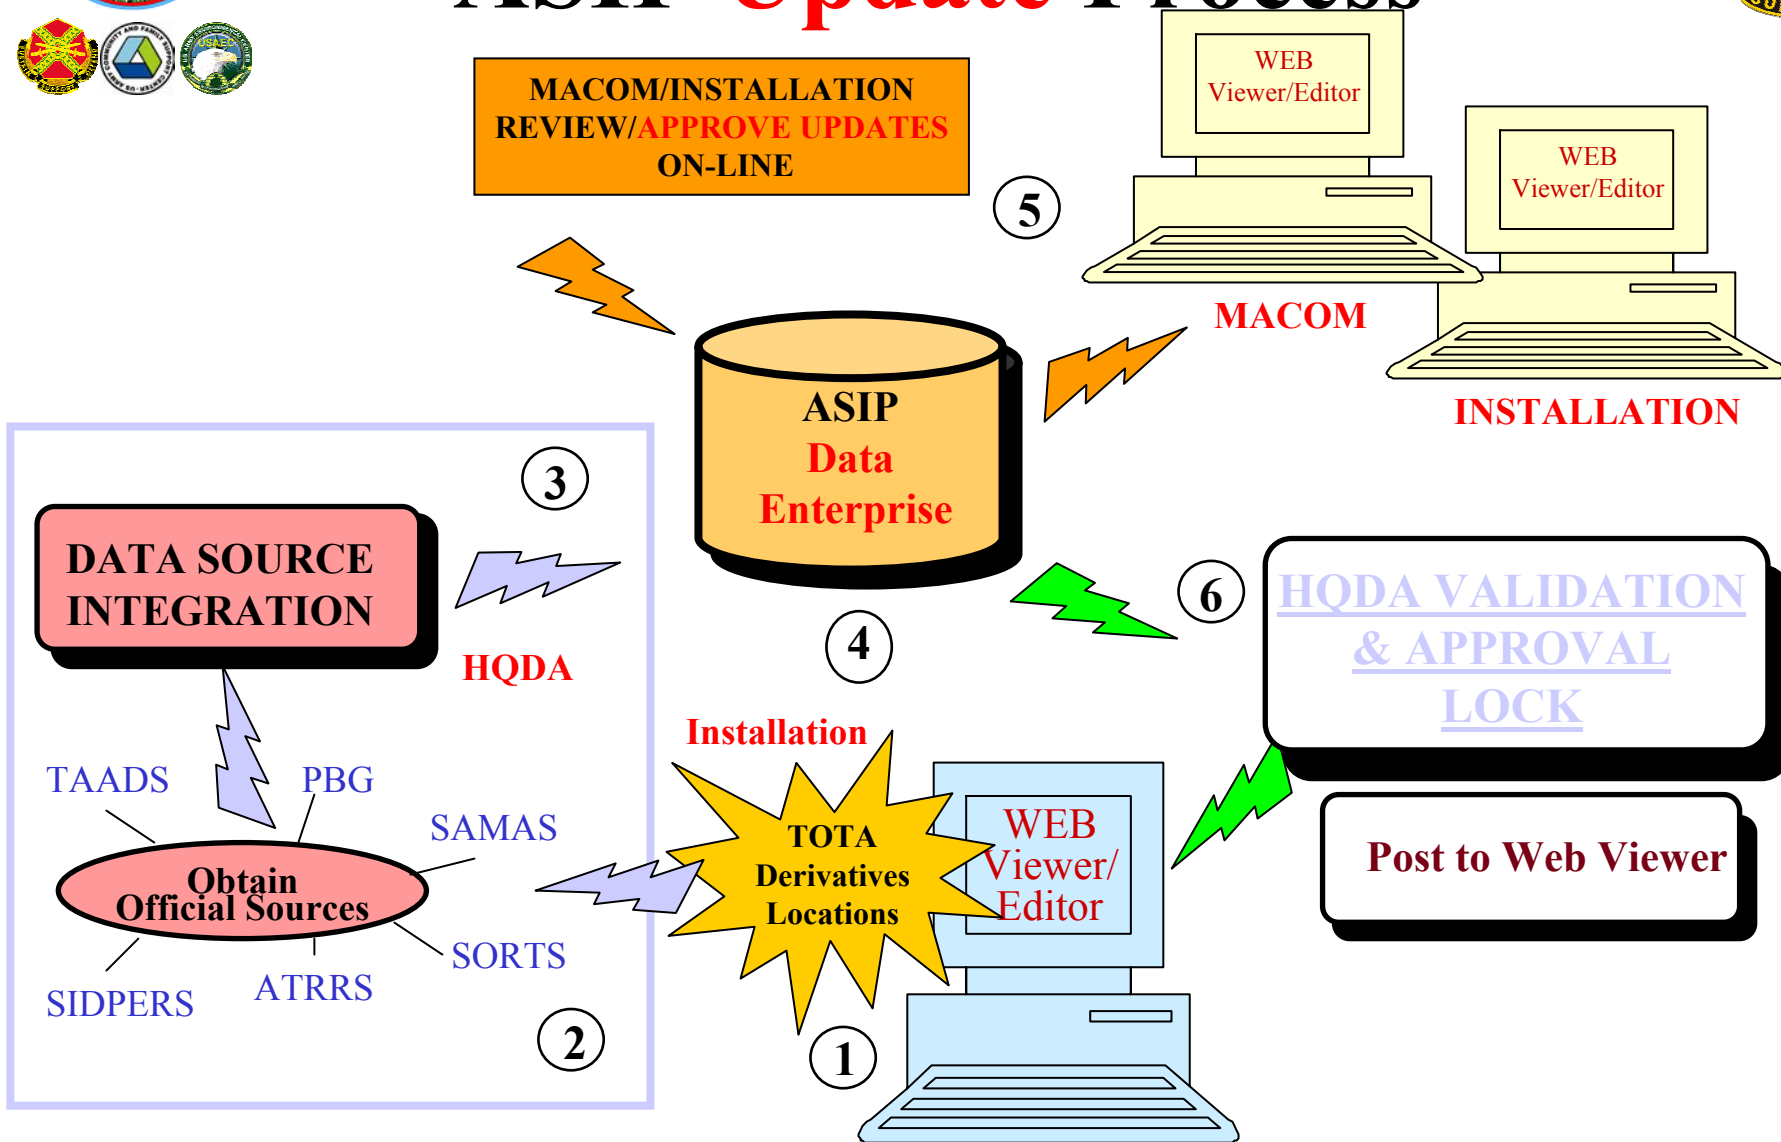

- Establish Business Rules for scrubbing data
- Create Collection Methodology
- Establish QA/QC process
- Design Audit Trail Documentation
- Design files (both manual and automated)

Part 2: Execution Phase

- Identify anomalies to business rules
- Collect the data – identify needed changes
- Audit trail all changes IAW Plan
- Prepare files IAW Plan

ASIP Update Process

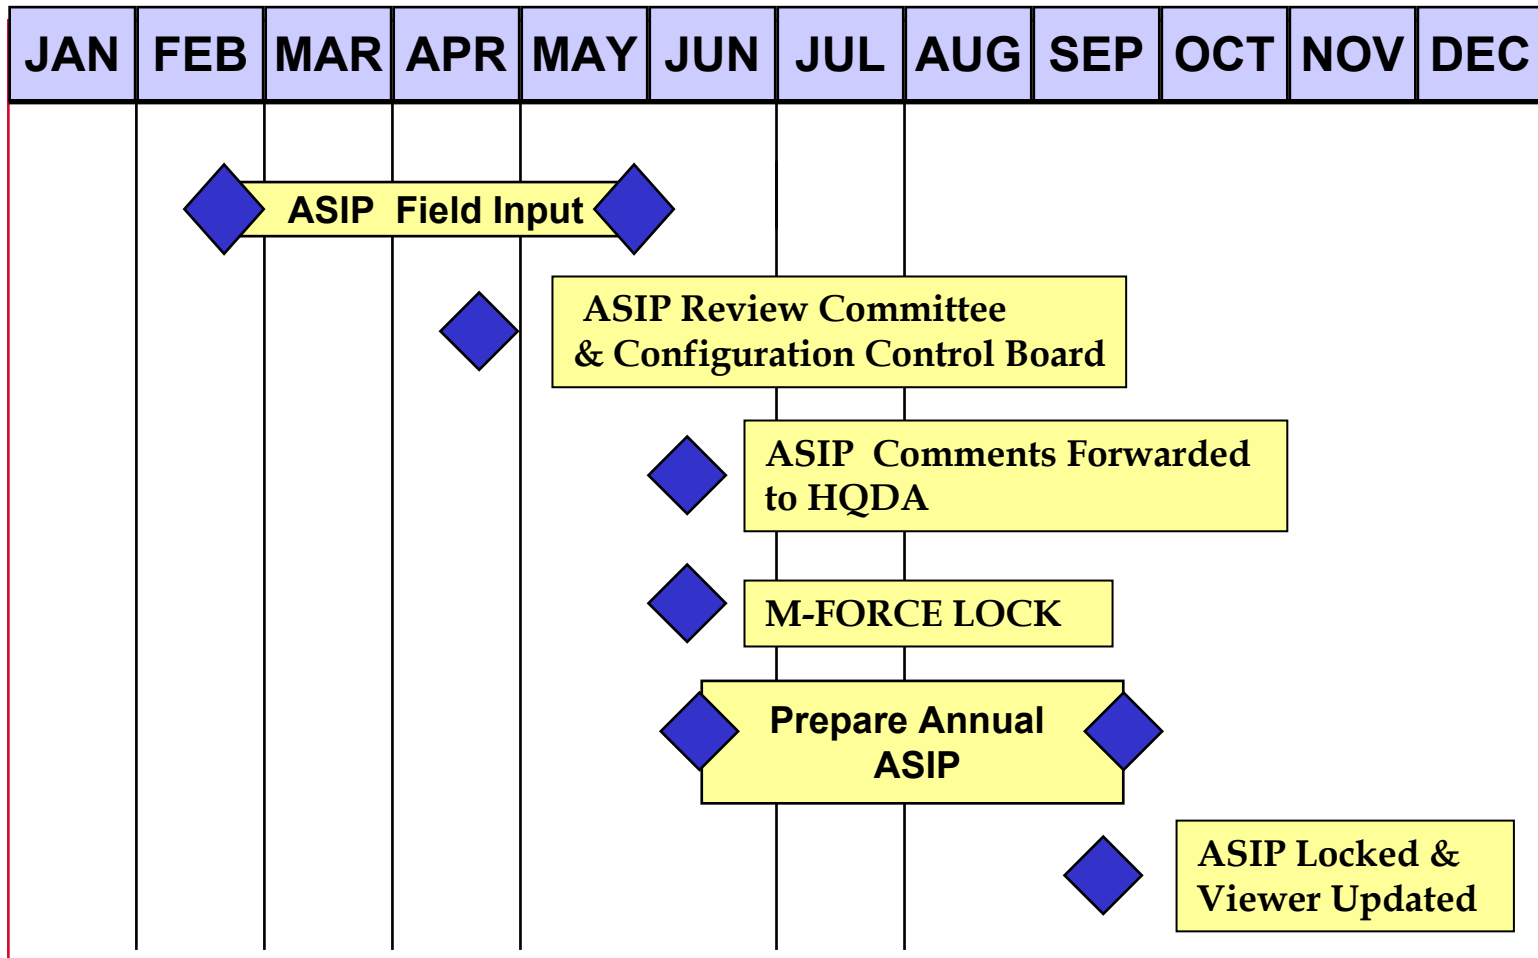

Why Do We Want To Do This?

- ASIP is one of the single most important reports in the Army
- Frankly – our report is not accurate, not easy to interpret, and not easy to validate
- This report has not gotten the Command attention it needs to be accurate
- This kind of effort cannot be done by one person & done correctly
- ASIP touches each of your jobs at some point – you all need to become SMEs of the report/process

ASIP Timeline

ASIP Role in SRM Requirements
